

“We are in business to make us money, not to make the utility companies money. Out of all of the equipment options, Maytag Energy Star front load washers put the most money in our pockets.” - Mark Runzo, Payson Laundromat

“We take pride in our business. An efficient and well run laundry facility is extremely important for success. Maytag is the logical equipment choice because of it’s long life, long 5 year parts warranty and energy efficiency. The equipment we use is only half of the equation for our success. Of all the companies selling commercial laundry equipment in Arizona, C-PEC is the best equipped to support our laundry. C-PEC has an in-house service department, parts in stock, offers free service schools to teach us how to maintain our equipment and was the easiest to work with. We have the best of both worlds, Maytag equipment and an exceptional company to stand behind the equipment.”
