FABRICS

An innovative cleaning solution designed specifically for use with Yamamoto WUD Series wet-cleaning machines.

The unique chemistry of MAESTRO Wet-Cleaning Solution combined with the superior technology of the WUD Series machines produces a noticeably cleaner result.

Automated wash cycles are designed to allow the cleaning solution to mix with water prior to adding garments. Garments are never directly exposed to untreated water.

Camellia oil, a natural ingredient in MAESTRO Wet-Cleaning Solution, coats the surface of the fabrics, protecting them from the damaging effects of water.

The Harmony Wet-Cleaning System allows for the replacement of harsh chemicals with milder solutions, eliminating hazardous waste & excessive pollution to the water, air, & soil.

Complete System

Each element of the Harmony Wet-Cleaning System has been carefully designed to work together to form a seamless process for professional wet cleaning.

Environmentally Friendly

Cleaning solutions are derived from natural ingredients. No harmful chemicals are used and no hazardous waste is produced.

Efficient Process

Automated wash programs and dry-to-dry cycles save time, labor, and space.

Superior Results

Harmony Wet-Cleaning System removes soil and odors better than traditional dry cleaning. Clothes look, feel, and smell cleaner!

NO SHRINKAGE

NO COMPRESSION

NO DEFORMATION

NO WRINKLES

NO FADING
