Rear Load

The new MC535RL-CC is a versatile rear load change machine that accepts both credit cards & cash and dispenses tokens. This new design features an LCD display that offers instructions and feedback to the customer and the choice of 3-Button Pulse payout, 4-Button Package payout or the Credit Select payout - in which the owner can customize the price and number of tokens dispensed for both credit card and cash acceptance.

In addition, the MC535RL-CC has a weather-proof card reader that has two-way mag stripe recognition, and two (2) Modular Series Hopper that holds a total of 10,400 quarter-sized tokens, and a Pyramid Bill Acceptor with 500 bills stacker. The machine is monitored and controlled by the Expanded Function Module. This EF Module gives the owner the ability to re-program his payout packages, check the transactions and audits, and program the optional Receipt & Audit Printer. The new credit card machines work on dial-up Host processing, using a POS Terminal device. High-speed internet Host processing is also available for cable-modem or DSL lines.

Accepting credit card payments has never been easier! With the MC535RL-CC, you'll have more flexibility in providing payment options, more satisfied customers and increased revenues.
