

OPAQUE™

On Demand Reporting and Transparency for Laundry Rooms

KNOWLEDGE

Your Choice, Your Solution, Your ESD

SUCCESS YOU CAN SEE

Proven Track Record

For over a decade, the ESD Value Adder Plus VTM has been installed in thousands of laundry rooms all over the nation. Convenience, security and reliability have made it the most popular VTM on the market. Now, ESD has harnessed the power of the internet to add on demand reporting and complete transparency to one of their most successful products.

- **Enhanced Security**
- **Easy to Use Reporting**
- **On Demand Information**

Enhanced Security

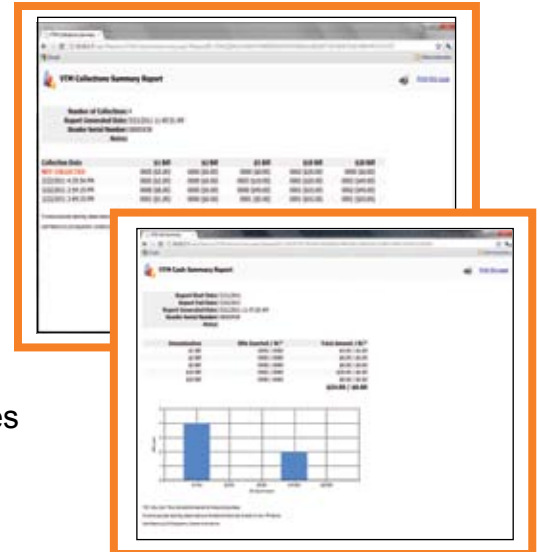

Built using the same cabinet as the Value Adder Plus, HS, you can expect enhanced security. Built with thick seven gauge steel, two locks, with optional lock brackets and security bar, Opaque joins the High Security as the most secure Transfer Machine available.

Easy to Use reporting

ESD has created a full suite of reports to easily monitor and manage the activity of all the Opaque VTMs at your location. You can easily find out, down to the dollar, how much money is in the VTM, as well as what your total activity is.

On Demand Information

The Opaque VTM, built with an on-board PC that communicates over the internet to a server, records every transaction. Each and every bill is tracked and recorded, with available real time reporting - 24 hours a day, 7 days a week.
