\*Disclaimer: Above information based on published data retrieved February 2014 from competitor website. Data compares 10 - 30lb washer-extractors against comparative competitor models.

The data provided is based on 4 turns/day, 365 days/year; water rate/1000 gallons = \$5.00; sewer rate/1000 gallons = \$5.00, 95% of incoming water goes to drain, 5% retained in load; heat cost/gallon = \$0.007, gas cost = \$1/therm, 75F temp rise, 85% gas heater efficiency, and 20% of incoming water is heated using an external water heater. Utility rates for water, sewer and heating vary widely. Check local rates and adjust estimated costs accordingly.

\*\*Finance payments of \$3.35 based on 100% MSRP equipment pricing for 10 HC30KCF models; offers subject to formal credit approval.
